EXPERIENCE

2024-07 – *present*

Full-stack Software Engineer
Develpify Studios, Lahore

> As a back-end developer, I've developed a deep expertise in Laravel, using it to build strong and reliable server-side components. My work emphasizes the efficient use of Laravel's tools for managing databases, developing API's, and handling server-side scripting in web applications. In addition to my back-end skills, I have a good grasp of front-end technologies, which allows me to integrate and harmonize back-end processes with front-end elements, ensuring that web applications are both cohesive and responsive.

2023-06 – 2024-7

Back-end Laravel Developer
BloomRix, Lahore

> As a back-end developer, I've owned my expertise in utilizing Laravel for crafting robust server-side components. My focus revolves around leveraging Laravel's features for efficient database management, API development, and server-side scripting within web applications.

2023-01 - 2024-3
